

DETAILED ACTION

1. This action is in response to the amendment filed 12/21/2007
2. Claims 1, 3-20, 22-29, 34, and 35 are allowed.
3. Per Applicant's request, claims 2, 21, 30-33, and 36-58 have been cancelled.

EXAMINER'S AMENDMENT

4. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Karl H. Koster (Registration No. 50,684) on 3/27/2008. The examiner's amendment is necessitated for further clarifying the claimed invention.

Claims 23, 34 and 35 have been amended as follow:

23 (Currently Amended) A method of downloading software, comprising:

receiving a host software file at a host file database, the host software file for configuring a host wherein the host software file contains messages for interacting with the host on a cable distribution network wherein the host software file is associated with a specific host manufacturer and a model of the specific host manufacturer;

maintaining a first list of at least one enhanced services system, the enhanced service system further associated with a destination address and the host software file;

maintaining a second list of the destination address associated with a set of communication parameters, the set of communication parameters including authentication information;

establishing a communication path between the host file database and the enhanced services system, the communications path using the destination address;

authenticating the host file database to the enhanced services system using in part the set of communications parameters;

transmitting the host software file from the host file database to the enhanced service system;

receiving a confirmation of the receipts of the host software file from the enhanced services system; and

recording an indication of the confirmation of the receipt of the host software file, the indication recorded in the host file database.

34 (Currently Amended) A method of downloading host software comprising:

receiving a host software file associated with a specific host manufacturer and a model associated with the specific host manufacturer;

determining an enhanced services system to receive the host software file
by retrieving a file associating an enhanced services system with a plurality of
host types, each host type comprising a specific host manufacturer identifier and
a model identifier associated with the specific host manufacturer and determining
if the host software file received matches one of the plurality of host types
associated with the enhanced services system;

establishing a connection from the enhanced services system to a host file
database;

authenticating the enhanced services system to the host file database;

transferring the host software from the host file database to the enhanced
services system;

recording an indication of the data and time associated with the
transferring of the host software to the enhanced service system;

storing the host software file in a second database located at the enhance
services system;

transmitting at least a portion of the host software file stored in the second
database to a host;

receiving a confirmation of receipt of the software from the host; and
recording an indication in the second database regarding the software
download to the host.

Claim 35 (Currently Amended) The method of claim ~~34~~ 34 wherein the host software file is tested for operation on a specific host manufacturer and host manufacturer's model.

Conclusion
